+ PROFILE

An experienced and delivery focused Project Manager with a significant level of business acumen and technical experience in implementing product development and business-level initiatives. He leads & motivates teams where successful relationships and positive outcomes are critical.

David's local and overseas experience has given him a pragmatic approach to achieving project success through clear and open communication and problem solving. This has resulted in a strong track record of delivery throughout his management career.

+ SIGNIFICANT ACHIEVEMENTS

- Planned and grew a new area of business for Embertec in the Internet-of-Things space, including hiring the team, setting up development processes, defining the product roadmap and managing the development work.
- Transitioned the engineering team at Hendon Semiconductors from an integrated circuit design house to a maker of electronic products for the lighting industry.
- Lead the annual company-wide strategic planning process for Infineon Technologies, one of the largest semiconductor firms in the world.
- Project managed the business acquisition efforts of Infineon Technologies towards a large mobile phone maker, resulting in a successful customer contract worth over 100 million Euros.
- Managed a program of 5-6 software development projects and 25 staff concurrently for Motorola.
