+ PROFILE

I have a strong career history in the management of technology development both for in-house and contract product development projects. My core competencies lie in the high-technology, IT and Telecommunications domains with considerable hands-on skill in managing service delivery, development teams and the development process. A common thread throughout my career has been the ability to comprehend and communicate complex technical and business issues at all levels.

My experience spans a wide range of technologies and methodologies in both hardware and software product development environments, including general Software Engineering, Mobile App Development, Full Stack Web Development, Telecoms Networking, Embedded Software Development, and Embedded Hardware Design and System on Chip (SOC) design. My personal communication skills, strong technical skills and management background equip me to add value to almost any business involved in product or technology development.

+ KEY ENGAGEMENTS (ADEPT)

Oasis Systems

Mobile Network Operator Billing Systems: Development and Deployment

Oasis Systems

Mobile Network Operator Billing Systems: Hybrid Project Management of Fixed Price Development and Deployment

Integrated Aviation Software

Web-based Aviation Logistics Management Software: Agile Software Development and Product Road-mapping

ASTC

Embedded Systems Simulation Tools: Product Roadmap development, marketing material creation

Acumen Data

Accounts Payable Automation: Agile Project Management of Development and Deployment

Solution Forest

IP Based Nurse Call System: Agile Project Management of Software Development

+ INDUSTRY EXPERIENCE

- Mobile Telecoms (handset and infrastructure)
- Embedded Systems (Automotive, Mobile)
- Aviation Logistics

+ SIGNIFICANT ACHIEVEMENTS

- Grew “Embedded Systems Tools” group of Motorola SW Group from a 4-person team into a 50 person world-wide unit.
- Grew “Application Specific Platforms” group of ASTC from a 6-person team into a 20 person world-wide unit.
- Implemented “Software Transformation” at SpectraQEST, taking their 14-person SW development team from ad-hoc development processes to become an efficient Product-focused Agile unit.

+ QUALIFICATIONS

MBA Modules: Entrepreneurship, Corporate Strategy

Australian National University

Electronic Engineering (1st Class Honours)

Adelaide University

+ TECHNICAL SKILLS/EXPERTISE

Project Management

Extensive experience with Agile Software Development (Jira, Confluence) and Traditional Methodologies (Waterfall, MS-Project), various estimation techniques (Story Point, Wideband Delphi, Function Point etc.) and extensive experience operating within SEI’s CMM for software engineering.

Product Management

Product Road-mapping (Aha, Confluence, Jira).

Software Engineering

Extensive experience in Javascript, HTML, CSS, Python, C, VHDL, Verilog, Perl, Lisp and various machine languages.

+ CAREER HISTORY

Adept Technology

Executive Consultant

ASTC (Australian Semiconductor Technology Company)

Principal Consultant

Freescale Semiconductor Australia (formerly Motorola SPS)

Chief Engineer, Manager

Castelain Pty Ltd

Principal Consultant

Motorola Global Software

Business Manager, Senior Product Manager, Operations Manager, Program Manager, Senior Software Engineer
